VALLEY REHAB & PHYSICAL THERAPY - DAILY TREATMENT NOTES
Patient: Morgan Ellis  DOB: 04/11/1985  Date of Injury: 01/09/2026
Visits 01/23/2026 through 05/28/2026

DAILY NOTE - Visit 1  Date: 01/23/2026
Subjective: Neck pain 7/10, low back pain 5/10. Tolerated home exercise program; stiffness worse in the morning.
Objective: Cervical rotation right 50 degrees, left 40 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), lumbar stabilization (10 min), moist heat (10 min).
Assessment: Tolerated session well with mild post-exercise soreness.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 2  Date: 01/26/2026
Subjective: Neck pain 7/10, low back pain 5/10. Reports headaches continue most days; sleep remains interrupted.
Objective: Cervical rotation right 51 degrees, left 41 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), lumbar stabilization (10 min), moist heat (10 min).
Assessment: Tolerated session well with mild post-exercise soreness.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 3  Date: 01/28/2026
Subjective: Neck pain 6/10, low back pain 5/10. Able to do light housework with breaks; neck fatigue by afternoon.
Objective: Cervical rotation right 51 degrees, left 42 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), lumbar stabilization (10 min), moist heat (10 min).
Assessment: Tolerated session well with mild post-exercise soreness.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 4  Date: 01/30/2026
Subjective: Neck pain 6/10, low back pain 5/10. Reports difficulty turning her head while driving on surface streets.
Objective: Cervical rotation right 52 degrees, left 42 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), lumbar stabilization (10 min), moist heat (10 min).
Assessment: Tolerated session well with mild post-exercise soreness.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 5  Date: 02/02/2026
Subjective: Neck pain 6/10, low back pain 4/10. Able to do light housework with breaks; neck fatigue by afternoon.
Objective: Cervical rotation right 52 degrees, left 43 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), lumbar stabilization (10 min), moist heat (10 min).
Assessment: Tolerated session well with mild post-exercise soreness.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 6  Date: 02/04/2026
Subjective: Neck pain 7/10, low back pain 4/10. Reports new tingling into the left hand, mostly at night.
Objective: Cervical rotation right 53 degrees, left 44 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), lumbar stabilization (10 min), moist heat (10 min).
Assessment: Tolerated session well with mild post-exercise soreness.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 7  Date: 02/09/2026
Subjective: Neck pain 6/10, low back pain 4/10. Still avoiding the freeway; husband drives children to daycare.
Objective: Cervical rotation right 54 degrees, left 45 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), lumbar stabilization (10 min), moist heat (10 min).
Assessment: Tolerated session well with mild post-exercise soreness.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 8  Date: 02/11/2026
Subjective: Neck pain 7/10, low back pain 4/10. Reports headaches continue most days; sleep remains interrupted.
Objective: Cervical rotation right 54 degrees, left 45 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), lumbar stabilization (10 min), moist heat (10 min).
Assessment: Tolerated session well with mild post-exercise soreness.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 9  Date: 02/13/2026
Subjective: Neck pain 6/10, low back pain 4/10. Reports headaches continue most days; sleep remains interrupted.
Objective: Cervical rotation right 55 degrees, left 46 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), lumbar stabilization (10 min), moist heat (10 min).
Assessment: Tolerated session well with mild post-exercise soreness.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 10  Date: 02/18/2026
Subjective: Neck pain 7/10, low back pain 4/10. Reports flare-up after lifting her son out of the bathtub on 02/14; neck pain 8/10 for two days. Missed 02/16 visit due to pain. Left hand tingling persists.
Objective: Cervical rotation right 56 degrees, left 47 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), lumbar stabilization (10 min), moist heat (10 min).
Assessment: Tolerated session with increased symptoms.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 11  Date: 02/20/2026
Subjective: Neck pain 6/10, low back pain 4/10. Tolerated home exercise program; stiffness worse in the morning.
Objective: Cervical rotation right 56 degrees, left 48 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), lumbar stabilization (10 min), moist heat (10 min).
Assessment: Tolerated session well with mild post-exercise soreness.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 12  Date: 02/23/2026
Subjective: Neck pain 5/10, low back pain 4/10. Able to do light housework with breaks; neck fatigue by afternoon.
Objective: Cervical rotation right 57 degrees, left 49 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), lumbar stabilization (10 min), moist heat (10 min).
Assessment: Tolerated session well with mild post-exercise soreness.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 13  Date: 02/25/2026
Subjective: Neck pain 6/10, low back pain 4/10. Saw orthopedic spine yesterday; now reports pain radiating into the right arm and numbness of the right thumb and index finger. Started gabapentin.
Objective: Cervical rotation right 58 degrees, left 49 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), nerve glides (10 min), moist heat (10 min).
Assessment: Tolerated session well with mild post-exercise soreness.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 14  Date: 02/27/2026
Subjective: Neck pain 6/10, low back pain 3/10. Reports headaches continue most days; sleep remains interrupted.
Objective: Cervical rotation right 58 degrees, left 50 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), nerve glides (10 min), moist heat (10 min).
Assessment: Tolerated session well with mild post-exercise soreness.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 15  Date: 03/03/2026
Subjective: Neck pain 6/10, low back pain 3/10. Reports difficulty turning her head while driving on surface streets.
Objective: Cervical rotation right 59 degrees, left 51 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), nerve glides (10 min), moist heat (10 min).
Assessment: Tolerated session well with mild post-exercise soreness.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 16  Date: 03/10/2026
Subjective: Neck pain 6/10, low back pain 3/10. Tolerated home exercise program; stiffness worse in the morning.
Objective: Cervical rotation right 59 degrees, left 52 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), nerve glides (10 min), moist heat (10 min).
Assessment: Tolerated session well with mild post-exercise soreness.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 17  Date: 03/12/2026
Subjective: Neck pain 5/10, low back pain 3/10. Able to do light housework with breaks; neck fatigue by afternoon.
Objective: Cervical rotation right 60 degrees, left 52 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), nerve glides (10 min), moist heat (10 min).
Assessment: Tolerated session well with mild post-exercise soreness.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 18  Date: 03/24/2026
Subjective: Neck pain 5/10, low back pain 3/10. Had cervical epidural steroid injection on 03/17. Missed 03/17 and 03/19 visits per physician instructions. Arm pain improved about 50%.
Objective: Cervical rotation right 61 degrees, left 53 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), nerve glides (10 min), moist heat (10 min).
Assessment: Tolerated session well with mild post-exercise soreness.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 19  Date: 03/26/2026
Subjective: Neck pain 5/10, low back pain 3/10. Reports headaches continue most days; sleep remains interrupted.
Objective: Cervical rotation right 61 degrees, left 54 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), nerve glides (10 min), moist heat (10 min).
Assessment: Tolerated session well with mild post-exercise soreness.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 20  Date: 03/31/2026
Subjective: Neck pain 5/10, low back pain 3/10. Reports difficulty turning her head while driving on surface streets.
Objective: Cervical rotation right 62 degrees, left 55 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), nerve glides (10 min), moist heat (10 min).
Assessment: Tolerated session well with mild post-exercise soreness.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 21  Date: 04/02/2026
Subjective: Neck pain 5/10, low back pain 2/10. Able to do light housework with breaks; neck fatigue by afternoon.
Objective: Cervical rotation right 62 degrees, left 56 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), nerve glides (10 min), moist heat (10 min).
Assessment: Tolerated session well with mild post-exercise soreness.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 22  Date: 04/09/2026
Subjective: Neck pain 5/10, low back pain 2/10. Arm symptoms returning over the past week. Frustrated with slow progress; tearful during session.
Objective: Cervical rotation right 63 degrees, left 56 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), nerve glides (10 min), moist heat (10 min).
Assessment: Tolerated session well with mild post-exercise soreness.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 23  Date: 04/14/2026
Subjective: Neck pain 4/10, low back pain 2/10. Able to do light housework with breaks; neck fatigue by afternoon.
Objective: Cervical rotation right 64 degrees, left 57 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), nerve glides (10 min), moist heat (10 min).
Assessment: Tolerated session well with mild post-exercise soreness.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 24  Date: 04/16/2026
Subjective: Neck pain 5/10, low back pain 2/10. Still avoiding the freeway; husband drives children to daycare.
Objective: Cervical rotation right 64 degrees, left 58 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), nerve glides (10 min), moist heat (10 min).
Assessment: Tolerated session well with mild post-exercise soreness.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 25  Date: 04/21/2026
Subjective: Neck pain 5/10, low back pain 2/10. Reports difficulty turning her head while driving on surface streets.
Objective: Cervical rotation right 65 degrees, left 59 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), nerve glides (10 min), moist heat (10 min).
Assessment: Tolerated session well with mild post-exercise soreness.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 26  Date: 04/23/2026
Subjective: Neck pain 7/10, low back pain 2/10. Carried laundry basket upstairs over the weekend; flare-up for 3 days.
Objective: Cervical rotation right 66 degrees, left 60 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), nerve glides (10 min), moist heat (10 min).
Assessment: Tolerated session with increased symptoms.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 27  Date: 04/28/2026
Subjective: Neck pain 5/10, low back pain 2/10. Reports difficulty turning her head while driving on surface streets.
Objective: Cervical rotation right 66 degrees, left 60 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), nerve glides (10 min), moist heat (10 min).
Assessment: Tolerated session well with mild post-exercise soreness.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 28  Date: 05/05/2026
Subjective: Neck pain 4/10, low back pain 2/10. Tolerated home exercise program; stiffness worse in the morning.
Objective: Cervical rotation right 67 degrees, left 61 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), nerve glides (10 min), moist heat (10 min).
Assessment: Tolerated session well with mild post-exercise soreness.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 29  Date: 05/07/2026
Subjective: Neck pain 4/10, low back pain 2/10. Tolerated home exercise program; stiffness worse in the morning.
Objective: Cervical rotation right 68 degrees, left 62 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), nerve glides (10 min), moist heat (10 min).
Assessment: Tolerated session well with mild post-exercise soreness.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 30  Date: 05/14/2026
Subjective: Neck pain 4/10, low back pain 1/10. Missed 05/12 visit to attend orthopedic follow-up. Discussing return to modified duty.
Objective: Cervical rotation right 68 degrees, left 63 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), nerve glides (10 min), moist heat (10 min).
Assessment: Tolerated session well with mild post-exercise soreness.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 31  Date: 05/19/2026
Subjective: Neck pain 4/10, low back pain 1/10. Able to do light housework with breaks; neck fatigue by afternoon.
Objective: Cervical rotation right 69 degrees, left 63 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), nerve glides (10 min), moist heat (10 min).
Assessment: Tolerated session well with mild post-exercise soreness.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 32  Date: 05/26/2026
Subjective: Neck pain 5/10, low back pain 1/10. Reports difficulty turning her head while driving on surface streets.
Objective: Cervical rotation right 69 degrees, left 64 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), nerve glides (10 min), moist heat (10 min).
Assessment: Tolerated session well with mild post-exercise soreness.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT

DAILY NOTE - Visit 33  Date: 05/28/2026
Subjective: Neck pain 4/10, low back pain 1/10. Reports difficulty turning her head while driving on surface streets.
Objective: Cervical rotation right 70 degrees, left 65 degrees. Muscle guarding upper trapezius and levator scapulae.
Treatment: Manual therapy to cervical and thoracic spine (15 min), therapeutic exercise including deep neck flexor training and scapular stabilization (25 min), nerve glides (10 min), moist heat (10 min).
Assessment: Tolerated session well with mild post-exercise soreness.
Plan: Continue plan of care. Therapist: Priya Nair, PT, DPT
